

## **NEW WATERLINES OR SERVICES**

**Any new water lines shall be required to meet the following:**

- A Drawing of service plans for the project must be submitted to the Town Office with this agreement.**

**Plans will include:**

- 1. Pipe size, type of pipe, and pressure rating**
- 2. Location of gate valves, curb stops, blow offs (with size) and thrust blocks**
- 3. Location of property lines, roads and applicable right of ways or easements. If new main or service is on private property a legal easement must be deeded to the Town of North Hero.**
- 4. Name of overseeing engineer or request to be over seen by Town of North Hero Operator.**

- B Project will require a state permit.**

- C Project must be overseen by engineer or North Hero Operator or designee.**

- D Required to pass appropriate pressure test performed by engineer or observed by North Hero Operator or designee. Cost to be borne by project owner (s) . Cost for North Hero Operator is \$50.00 per hour.**

- E Pass state bacteria test performed by engineer or North Hero Operator or designee. Cost to be borne by project owners (s).**

- F Before water can be turned on to user:**

- 1. North Hero Operator or designee will perform an inspection of the required plumbing to the user per Water Department Policy.**
- 2. Paper work showing compliance with all of the above must be submitted to the North Hero Operator.**

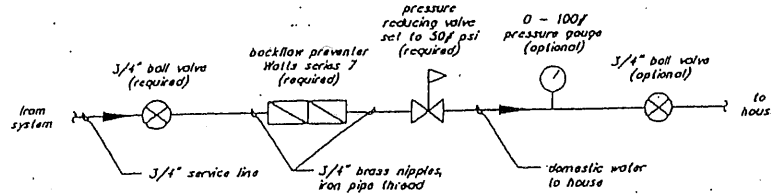

TYPICAL BUILDING WATER SERVICE MUST HAVE BEFORE THE WATER CAN BE TURNED ON

**Note: Your private plumber cannot turn the water on!**

3/4" ball valve (required)	backflow preventer watts series No. 7 (required)	Pressure reducing valve set to 50/ psi (required)	0 - 100/ pressure gauge (optional)	3/4" ball valve (optional)
-------------------------------	--	--	--	-------------------------------

from system

to house

3/4" service line  
type "K" copper or  
CT PE 200 PSI rated

3/4" brass nipples,  
iron pipe thread

domestic water  
in house

  2. New gate valves will be resilient wedge ANSI/AWWA C509 (open left)
  3. New service connection will be double strap saddle S.S. type with C.C. threads
  4. Curb stops located at edge of R.O.W. will be 1/4 turn ball valve (non draining)

**TOWN OF NORTH HERO  
WATER SERVICE AGREEMENT**

**TERMS AND CONDITIONS:**

- A. Construction of the proposed water service or water main is contingent upon receipt of fee payment and State approval of design of construction.**
- B. Water service to any particular property is not guaranteed by this Agreement. Any such decisions of serviceability shall be made exclusively by the Town of North Hero.**
- C. The water user shall be required to arrange and pay for the installation and connection of all service piping from the Town water main to the intended use. Service to any property Town water main shall be at the exclusive expense of the user (s).**
- D. Water shall be provided through a single service line or water main only for such uses described in Item F. Additional uses or a change in use shall result in revision of this contract and/or a change in fees.**
- E. Water service shall be provided subject to the conditions of the Rules and Regulations as promulgated from time to time by the Board of Water Commissioners.**
- F. In the case of connections to existing systems, such systems shall be upgraded to Town standards, prior to providing service by the Town. If such systems are not upgraded and do not meet Town standards, the Town will not assume to supply water. All maintenance and operational costs of privately owned lines would, therefore, be borne by those served. The Town will also require the installation of a meter and meter pit meeting the Town's specifications at the point of the connection to the municipal water system. Cost to the water customers for usage shall be based upon the same cost to other system users, plus a metered use charge prorated to all connected users for water consumption over and above the nominal allowance per ERU. ERU = Equivalent Residential Unit (set at 240 gpd), by measuring the total quantity of water passing through the meter. This Policy is intended to protect the Town from the expense of water lost through leakage in the private systems not meeting Town construction standards.**
